

PIELSTICK ENGINE

Refurbishment of fuel injection equipment

Our experience is your guarantee

Refurbish your fuel injection equipment will :

- make **savings** with optimised **performance**
- improve the **availability** of your engine
- extend the **service life** of your engine

In our **fuel injection equipment workshop**, a **team of specialists** uses the same means as those used for new parts to carry out the refurbishment operations on your equipment. These operations are performed to meet the **shortest lead** time requirements.

PIELSTICK ENGINE

Refurbishment of fuel injection equipment

Benefit from the best know-how and greatest responsiveness of our teams

These operations include :

- Dismantling, cleaning
- Inspection, assessment of the condition of the components (visual, dimensional, Non Destructive Testing)
- Repairing or renewing the inspected components
- Reassembling and setting as per the state of the art
- Control of the parts for good operation and test bench setting
- Packaging and shipment of the equipment
- Transmission of the refurbishment report

All these operations are carried out to the same **quality requirements** as in new part manufacturing processes.

Fuel injection specialists, we guarantee to perform and to meet PIELSTICK standards in terms of performance and methods.
