

OEM Service

for Mirrlees Blackstone, Paxman,
Ruston and English Electric engines

Quality Service For Quality Engines

MAN Diesel | PrimeServ

As the owner/operator of a **Mirrlees Blackstone, Paxman, Ruston** or **English Electric** diesel engine, the success of your business depends on the quality of its performance. This in turn depends on the quality of servicing and maintenance the engine receives, and there is no better way to ensure its continued reliability and efficiency than by dealing with the original engine manufacturer.

MAN Diesel PrimeServ UK provides a comprehensive range of services and technical support for all these engine types, worldwide on land or at sea. Backed by decades of engineering experience and expertise, we bring our unique professional skills to bear in every situation where an engine needs to be maintained, repaired, inspected, upgraded or relocated.

Our service engineers can be mobilised within 24 hours to any part of the world and will deal with every aspect of engine care, whether planned or emergency-driven. We can act in a supervisory capacity to local staff where required, and will liaise closely with suppliers of associated equipment to ensure that complete installations are returned to service quickly and effectively.

We provide full warranty support together with scheduled servicing and routine maintenance, as well as a prompt breakdown service and a variety of testing, installation, commissioning, modification and relocation services. MAN Diesel PrimeServ UK will help you to minimise your overheads, maximise your efficiency and keep your engines running with the least downtime for as long as possible.

Key benefits:

- > Cost-effective through-life support for a wide range of engine types
- > Quality and reliability assured through genuine OEM parts and expertise
- > Reduced downtime and lower running costs through more efficient operation
- > Extended, more productive engine life
- > Skilled engineers available worldwide
- > On-site supervision of local staff to minimise costs

Delivering Lifetime Confidence Through Worldwide Service

MAN Diesel PrimeServ UK offers a vast range of service activities that have been specially developed to help you conduct your business operations as successfully as possible. Typically, these include:

- > 24-hour technical support 365 days a year
- > Service engineers on-call and mobilised within 24 hours worldwide
- > Support and backup by vastly experienced team of OEM engineers
- > In-depth knowledge of latest technical developments and design updates
- > Recommendation and implementation of cost-saving preventative measures
- > Full or partial engine overhauls and maintenance, worldwide, on-site or on-board
- > Supervision of local staff carrying out planned service or engine overhauls
- > Comprehensive Fast Ferry engine overhauls
- > Take-off and bolt-on OEM reconditioned sub-assemblies (water/oil pumps, governors, intercoolers, fuel injection and injection pumps etc.) to reduce engine down-time
- > On-site or on-board engine familiarisation and training
- > Engine performance testing with full report and recommendations to restore engines to OEM specifications
- > Ultrasonic testing and boroscope inspections
- > Highly trained technical field support and investigation engineers providing assessments of engine damage/ crankshaft inspections and OEM recommended repairs to Classification Societies' rules
- > Full access to original technical documents and test records
- > Complete factory engine overhauls, bedplate, crankshaft, crankcase renewals and in-situ repairs to major engine components
- > New and old engine installation and commissioning
- > Investigation and detailed reporting of component failures
- > Rehabilitation and relocation of redundant prime movers and auxiliary equipment, from initial inspection to re-commissioning of equipment at new location
- > Highly trained staff fully conversant with both prime mover and its associated equipment
- > Technical liaison with suppliers of associated components including the development and advancement of components to optimise prime mover performance
- > Engine modifications and upgrades to existing prime movers to latest design specifications
- > 'One-stop' single point of contact maintenance and repair for complete installations, including other manufacturers' equipment
