

MAN B&W Diesel two-stroke engines enter the Vietnamese market

In August two 7S35MC engines are delivered to Vietnam from MAN B&W Diesel A/S in Frederikshavn, Denmark, who have built the engines. They are to be installed in two 11,500 dwt freighters ordered by Vinashin Shipping and Service Company from the Bach Dang and Ha Long Shipyards.

One of the two 7S35MC engines ready to ship to Vietnam

A 7S35MC engine has an output of 5,180 kW at 173 r/min.

The 35MC was the first engine in the MC-engine programme when it was introduced two decades ago and has proved a huge success with more than 1,000 engines ordered or delivered. In total there are 6,885 MC engines on order or delivered as per July 2002.
